The Automation Trap

Own your Data Products

+7%

Average revenue growth driven by AI
(IBM, 2024)

While companies strive to digitize and streamline operations, most data initiatives fail due to **technical complexity and misalignment with business priorities.**

95%

AI pilots often deliver zero or negative ROI (MIT, 2025).

7%

Companies have fully deployed and scaled AI solutions. (McKinsey, 2025).

From Pilot to Results

Our Solution: MVP60™

We turn data and AI concepts into production-ready prototypes;
complete with business case validation and governance
frameworks.

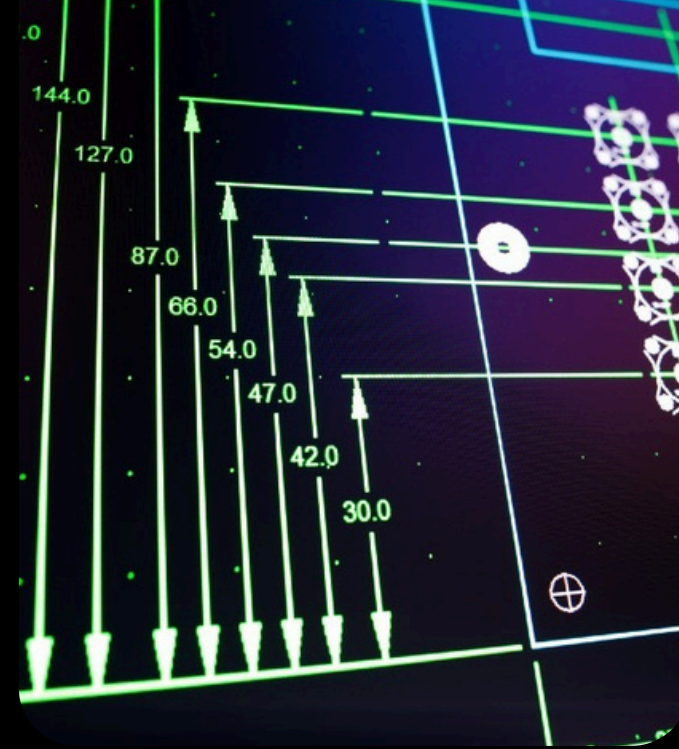

60

Days

To validated, production-ready data
process.

What We Do

We partner with companies across the full data value chain:

Data Governance

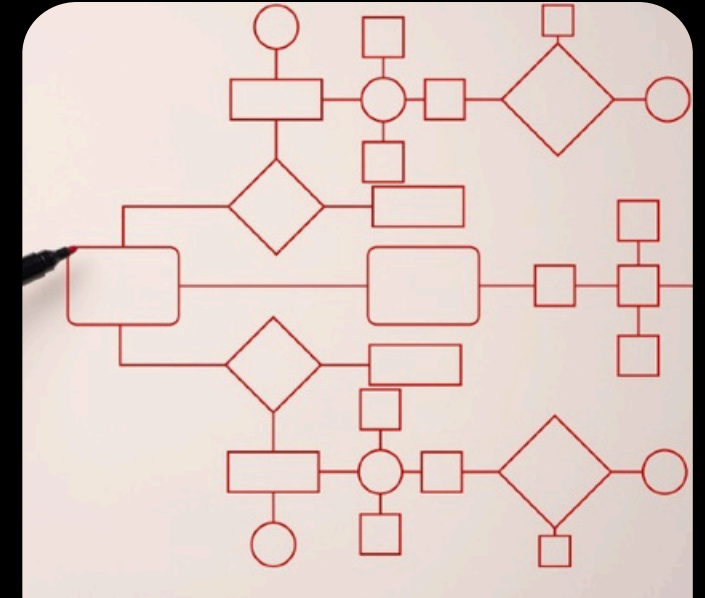

We establish robust frameworks for data governance and auditability.

Process Optimization

We streamline report and dashboard generation through automation.

Reporting Automation

We automate and connect workflows using AI and advanced analytics.

Case Study: Midis Group

Financial Automation

99% ▼

Time saved

Midis Group, a Lebanese technology conglomerate, needed to automate its financial consolidation process. Our prototype cut reporting time by **99%**, allowing efficient cross-company and regional performance analysis.
