

BEEGLETON INTELLIGENCE

AI-NATIVE. BUSINESS-DRIVEN.

The tech partner for ambitious companies.

WHO WE ARE

TECH WITH BUSINESS SENSE

We are developers, strategists and designers who understand business models, growth and organisations, not just code. AI is how we work, not something we sell for its own sake.

THE PROBLEM

YOU HAVE THE PROBLEM.

SYSTEMS THAT ALMOST FIT

Standard software forces the business to adapt to it.

DATA IN SILOS

Accounting, time reporting and projects share some data, and none of them has AI.

MANUAL PROCESSES

Emails, attachments and long forms hold work together by hand.

WHAT WE DO

FROM AI STRATEGY TO SYSTEMS IN PRODUCTION

01

AI DEVELOPMENT & CUSTOM SYSTEMS

Business systems and internal tools built around how you work, from first prototype to production.

02

AI AGENTS & AUTOMATION

We connect your systems and let models handle the manual steps in between: sorting, drafting, answering and following up.

03

AI TRAINING & ADVISORY

Strategy, workshops and training for boards and leadership teams that want to turn AI into business value.

CASE STUDIES

AI SOLUTIONS IN DAILY USE

Systems in production. No demos, no concepts.

CLIENT CASE

THE SCHOLARSHIP MANAGER

IN-HOUSE

PULSE & NECTAR

CLIENT CASE

THE SCHOLARSHIP MANAGER

We replaced a manual process of emails, attachments and long forms with one digital system for applications, additional information, comments, decisions and statistics.

IN-HOUSE CASE

PULSE & NECTAR

Our information sat in separate systems. Pulse and Nectar bring it together, automate recurring tasks and let AI analyse data from several systems at once.
