## WHAT WE DO

### Software engineering

We have over **15 years** of **experience** and **expertise** in creating software from scratch. From planning to **development** and creating an **MVP** to **QA** and **testing** to **deployment** to updates and **maintenance**. Amongst **many developed**, GrabIT is an **owner** of a **Global Logistics Software** - our own 12 years old digital child that we are particularly **proud of**.

### Data science

Our team of **expert data scientists** is dedicated to **designing** and implementing **tailored data science** solutions aimed at **improving** your business **decision-making**, optimizing operations, and **enhancing** customer experiences. We work in **close collaboration** with you, ensuring our **customized solutions** align with your **specific needs** and **surpass your expectations**.

### Partnerships

Are you in the pursuit of an **adept companion** for your **digital journey**? In the digital world, **finding a partner to rely on**, capable of guiding you through the intricacies of **digital transformation**, is a **fundamental requirement** for businesses. This is where **our proficiency** lies: in offering **dependable solutions**, **propelling businesses** of diverse scales toward their targets while amplifying their revenue.

---

## HOW WE DO

**Through flexibility and adaptability**

**Through strict compliance to your standards**

**Through dedication to long term collaboration**

**Our most utilized models are:**

**Project based collaboration**

**Time and material / full time dedicated teams**

We are a **reliable IT partner** that provides **high-end IT services**. Whether you need us to **create software**, or you have a **data science project** or you simply need us to **provide** you with a **dedicated team of developers** - we will answer. Hand-to-hand we will also provide **expertise and consultancy**.

---

## OUR FORTE

### Banking

We are deeply in the field of software engineering, advanced analytics and machine learning. We have created various apps and models which helped our clients gain the most valuable insights and make informed decisions. It all led to profit increase and improvement in so many fields of their work.

### Telecommunications

We have extensive experience and expertise when it comes to the telco industry. Both in software engineering and data engineering and science, our forte being on the latter. We are working in the domains of IoT, cloud solutions, data and analytics, and artificial intelligence.

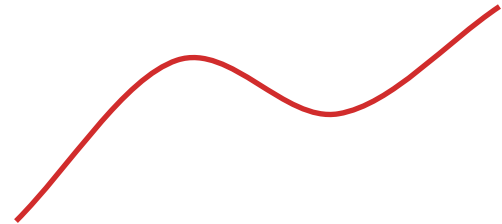

### Marketing

Yet another industry in which we excel. We work in the domains of software engineering, continuous delivery, and continuous integration, data analytics, the ML/AI chatbot and much more.

### Retail

When it comes to data science and retail, look no further. We have huge experience in data analytics, machine learning, and software engineering.

## TESTIMONIALS

"Our company requires fantastic craftsmen and partners with indisputable moral and ethical standards. These kind of people, let alone companies, are hard to find. GrabIT is this kind of company."

**Andraž Logar, CEO, 3fs**

"Through their profound understanding of business analytics, data modeling, and machine learning, GrabIT seamlessly navigated the intricacies of our projects, consistently delivering remarkable results. Beyond their technical abilities, GrabIT's professionalism and dedication were truly exemplary. Their team approached each project with a strong commitment to excellence, consistently surpassing our expectations in terms of deliverables and timelines."

**Anna Arlorio**  
**Senior managing director, Delta Partners**

"Collaborating with GrabIt has been truly rewarding. Their team exhibits remarkable professionalism and intelligence, always delivering exceptional data engineering and data science services. Their agile approach and commitment to punctuality have greatly contributed to their emerging presence in the industry. I highly recommend GrabIt to any organization seeking accurate, insightful data solutions delivered in a timely manner."

**Tine Papič, Product Owner SAS Analytics, Spar Business Services GmbH**
